

## ORNAMENTAL DESIGN

"As the centre-point of any home, the kitchen must serve as a tribute to the rest of the property. This owner was building a stately house characterised by an ornate decorative style throughout. The home's late Victorian era suited our Provence joinery range with its beautiful French provincial look. Thematically, the kitchen had to match the home's ornamental features yet maintain functionality and provide a warm, inviting place for the family to gather. The project took three months to complete and incorporates exquisite and authentic hand-carved, custom-made cabinetry and detail."

**Designer: Guido Steding for Steding Interiors and Joinery**

*We love the traditional look achieved by face-frame cabinetry and large dentil cornice.*

### EXPERT TIP

Interior joinery should unify the home's exterior architecture.

### SHOP THE LOOK

- **Cabinetry & Panels**  
Custom-made framed construction, recessed panel with Hotham profile
- **Internal hardware** Hettich soft-close runners and Kesseböhmer spice rack
