

HAMPTONS ELEGANCE

"Hamptons-style cabinetry, hand-painted finishes and exquisite detailing come together in this design to create a unique style of refined elegance. This classic look is the result of solid timber doors with recessed panels, stunning marble benchtops and a light colour palette complemented by the tallowwood flooring. The distinctive style of the cabinetry has been achieved by using a traditional face-framed construction technique that conceals the joinery. Intricate features such as a chamfered cornice, porcelain handles and elaborate lighting add a decorative touch, while European appliances give this design a contemporary twist. Large skylights provide plenty of natural light, enabling the windowless walls in this narrow area to be utilised for storage and bench space."

Designer: Guido Steding for Steding Interiors & Joinery

EXPERT TIP

Skylight windows are an excellent way of providing additional natural lighting.
