

WALNUT BEAUTY

"An alluring combination of timber and colour creates this sophisticated kitchen. The renovation embraces the traditional style of the home, incorporating sophisticated and functional design elements. The island bench sits majestically in the centre, its solid American walnut top exuding rich timber tones that bring depth to the space. The timber's natural warmth is intensified by the contrast of the light Caesarstone benchtops, walls, white sink and mouldings. The eye naturally follows the line of the benchtop to the huge double fridge, which is surrounded by panels to give the illusion of drawer towers. At the opposite end, V-ZUG ovens are flush mounted into the cabinetry, creating a gleaming line of mirrors. Throughout the kitchen, the Hamptons-style doors and panels create the traditional feel the owners desired, with the grey finish adding a contemporary touch. The crystal knobs are a final visual treat. With the inclusion of top-of-the-range appliances, plenty of storage and worktop space to match, this truly sophisticated kitchen offers everything the owners could need."

Designer and manufacturer: Steding Interiors & Joinery

We love the rich walnut timber bench.
